Test pressure: 20/200 I.P. pressure stable: ☒

Product code: AP0241 / 11300045 x2

Product code: /

Comments: Reduce Octopus hose

### IMPORTANT

**We strongly recommend you test serviced equipment in a safe confined water such as a swimming pool prior to use in open water.**

*We have no ability to wet test valves, most manufacturers suggest you perform a vacuum test prior to use, in addition to any normal equipment checks.*

*It is our policy to seek training and advice from the equipment suppliers or manufacturers, however we reserve the right to use our judgement in the servicing of equipment as to which parts to replace. This does not affect your statutory rights.*

*We will not replace items that are not standard service kit parts without your permission, such as mouthpieces, we do not inspect under hose protection, unless specifically asked, consoles are not serviced, unless specifically asked.*

*All work is warranted for 3 months if tamper paint seals are unbroken. Some valves may require slight adjustment after 2-3 uses, if you feel your valve has bedded in slightly loose or tight, please call in and we will fix this free of charge, usually, while you wait.*

*If your valve tastes strange, don't be alarmed, we only use non toxic cleaning agents and this taste will disappear before the next dive.*

Next service due: 27/10/16 Technician: [Signature] Date: 27/10/15
