

# BRISTOL CHANNEL DIVING REGULATOR SERVICE REPORT (F4)

Customer name Bristol Uni Phone.....  
 Model Scubapro MK II Serial No. 0200516482  
 Warranty..... Service  Health check..... Check fault.....  
 Pre-disassembly I.P. 10 psi / bar Condition Good  
 External inspection  Pre strip test   
 Disassembly  Clean   
 Fit service  Inspect remaining parts   
 Inform defective parts  Reassemble   
 Adjust I.P. 10 psi / bar Adjust 2<sup>nd</sup> stage   
 Adjust octopus  Final test   
 Inhalation port 1/4" Leak test   
 Test pressure 20/200 I.P. pressure stable   
 Product code 1004245 / 11300045 x2 11300008  
 Product name H.P. HOSE  
 Comment: Replace Diaphragm in Octopus, Replace  
Octo mouthpieces customer supplying own mouthpieces  
Replace H.P. Hose.

### IMPORTANT

We strongly recommend you test serviced equipment in a safe confined water such as a swimming pool prior to use in open water.

We have no facility to wet test valves, most manufacturers suggest you perform a vacuum test prior to use, in addition to any normal equipment checks.

It is our policy to seek training and advice from the equipment suppliers or manufacturers, however we reserve the right to use our judgement in the servicing of equipment as to which parts to replace. This does not affect your statutory rights.

We will not service items that are not standard service kit parts without your permission, such as mouthpieces. We do not inspect under hose protection, unless specifically asked, consoles are not serviced unless specifically asked.

All work is warranted for 3 months if tamper paint seals are unbroken. Some valves may require slight adjustment - 2-3 uses, if you feel your valve has bedded in slightly loose or tight, please call in and we will test this free of charge, usually, while you wait.

If your valve tastes strange, don't be alarmed, we only use non toxic cleaning agents and this taste will disappear before your next dive.

Next service due 27/10/15 Technician Bob Date 27/10/15
